

PRACTICE SHEET 1

1. A and B together can finish a job in 24 days, while A, B and C together can finish the same job in 8 days. C alone will finish the job in
 (1) 12 days (2) 14 days
 (3) 16 days (4) 24 days
2. A and B together can do a piece of work in 10 days. A alone can do it in 30 days. The time in which B alone can do it is
 (1) 10 days (2) 12 days
 (3) 15 days (4) 20 days
3. A can do a piece of work in 4 hours; B and C can do it in 3 hours. A and C can do it in 2 hours. How long will B alone take to do it?
 (1) 10 hours (2) 12 hours
 (3) 8 hours (4) 24 hours
4. A and B can do a work in 12 days, B and C in 15 days and C and A in 20 days. If A, B and C work together, they will complete the work in :
 (1) 5 days (2) $7\frac{5}{6}$ days
 (3) 10 days (4) $15\frac{2}{3}$ days
5. A and B can do a piece of work in 72 days. B and C can do it in 120 days, A and C can do it in 90 days. In how many days all the three together can do the work?
 (1) 80 days (2) 100 days
 (3) 60 days (4) 150 days
6. A can do a work in 6 days and B in 9 days. How many days will both take together to complete the work?
 (1) 7.5 days (2) 5.4 days
 (3) 3.6 days (4) 3 days
7. A and B can do a piece of work in 10 days, B and C in 15 days and C and A in 20 days. C alone can do the work in :
 (1) 60 days (2) 120 days
 (3) 80 days (4) 30 days
8. P can complete $\frac{1}{4}$ of a work in 10 days, Q can complete 40% of the same work in 15 days, R, completes $\frac{1}{3}$ of the work in 13 days and S, $\frac{1}{6}$ of the work in 7 days. Who will be able to complete the work first?
 (1) P (2) Q
 (3) R (4) S
9. A, B and C can complete a piece of work in 24, 6 and 12 days respectively. Working together, they will complete the same work in
 (1) $\frac{1}{4}$ day (2) $\frac{7}{24}$ day
 (3) $3\frac{3}{7}$ days (4) 4 days
10. A and B together can complete a piece of work in 72 days, B and C together can complete it in 120 days, and A and C together in 90 days. In what time can A alone complete the work?
 (1) 80 days (2) 100 days
 (3) 120 days (4) 150 days
11. A and B together can complete a work in 8 days and B and C together in 12 days. All of the three together can complete the work in 6 days. In how much time will A and C together complete the work?
 (1) 8 days (2) 10 days
 (3) 12 days (4) 20 days
12. A alone can complete a work in 12 days. A and B together can complete it in 8 days. How long will B alone take to complete the work?
 (1) 24 days (2) 18 days
 (3) 16 days (4) 20 days
13. If A and B together can complete a work in 18 days, A and C together in 12 days and B and C together in 9 days, then B alone can do the work in
 (1) 18 days (2) 24 days
 (3) 30 days (4) 40 days
14. A can finish a work in 24 days, B in 9 days and C in 12 days. B and C start the work but

are forced to leave after 3 days. The remaining work was done by A in:

- (1) 5 days (2) 6 days
(3) 10 days (4) $10\frac{1}{2}$ days

15. A and B can together finish a work in 30 days. They worked together for 20 days and then B left. After another 20 days, A finished the remaining work. In how many days A alone can finish the job?

- (1) 50 days (2) 60 days
(3) 48 days (4) 54 days

16. A and B together can complete a work in 8 days. B alone can complete that work in 12 days. B alone worked for four days. After that how long will A alone take to complete the work?

- (1) 15 days (2) 18 days
(3) 16 days (4) 20 days

17. A can do a work in 20 days and B in 40 days. If they work on it together for 5 days, then the fraction of the work that is left is :

- (1) $\frac{5}{8}$ (2) $\frac{8}{15}$
(3) $\frac{7}{15}$ (4) $\frac{1}{10}$

18. A and B working separately can do a piece of work in 10 days and 15 days respectively. If they work on alternate days beginning with A, in how many days will the work be completed?

- (1) 18 days (2) 13 days
(3) 12 days (4) 6 days

19. A can finish a work in 18 days and B can do the same work in half the time taken by A. Then working together what part of the same work they can finish in a day?

- (1) $\frac{1}{6}$ (2) $\frac{2}{5}$
(3) $\frac{1}{9}$ (4) $\frac{2}{7}$

20. A work can be completed by P and Q in 12 days, Q and R in 15 days, R and P in 20 days. In how many days P alone can finish the work?

- (1) 10 days (2) 20 days
(3) 30 days (4) 60 days

21. A and B can do a work in 18 and 24 days respectively. They worked together for 8 days and then A left. The remaining work was finished by B in:

- (1) 5 days (2) $5\frac{1}{3}$ days
(3) 8 days (4) 10 days

22. A can do a piece of work in 12 days and B can do it in 18 days. They work together for 2 days and then A leaves. How long will B take to finish the remaining work?

- (1) 6 days (2) 8 days
(3) 10 days (4) 13 days

23. A and B can do a job in 6 and 12 days respectively. They began the work together but A leaves after 3 days. Then the total number of days needed for the completion of the work is:

- (1) 4 days (2) 5 days
(3) 6 days (4) 9 days

24. A and B can do a piece of work in 28 and 35 days respectively. They began to work together but A leaves after sometime and B completed remaining work in 17 days. After how many days did A leave?

- (1) $14\frac{2}{5}$ days (2) 9 days
(3) 8 days (4) $7\frac{5}{9}$ days

25. A and B can complete a work in 15 days and 10 days respectively. They started doing the work together but after 2 days, B had to leave and A alone completed the remaining work. The whole work was completed in:

- (1) 10 days (2) 8 days
(3) 12 days (4) 15 days

26. A and B can do a piece of work in 20 days and 12 days respectively. A started the work alone and then after 4 days B joined him till the completion of the work. How long did the work last?

- (1) 10 days (2) 20 days
(3) 15 days (4) 6 days

27. A does $\frac{7}{10}$ part of work in 15 days. After that he completes the remaining work in 4 days with the help of B. In how many days will A and B together do the same work?

- (1) $10\frac{1}{3}$ days (2) $12\frac{2}{3}$ days

(3) $13\frac{1}{3}$ days

(4) $8\frac{1}{4}$ days

28. A does $\frac{4}{5}$ of a piece of work in 20 days; He then calls in B and they finish the remaining work in 3 days. How long B alone will take to do whole work?

(1) $37\frac{1}{2}$ days

(2) 37 days

(3) 40 days

(4) 23 days

29. A and B can do a work in 45 days and 40 days respectively. They began the work together but A left after some time and B completed the remaining work in 23 days.

After how many days of the start of the work did A leave?

(1) 10 days

(2) 9 days

(3) 8 days

(4) 5 days

30. A can complete $\frac{1}{3}$ of a work in 5 days and B,

$\frac{2}{5}$ of the work in 10 days. In how many days both A and B together can complete the work?

(1) 10 days

(2) $9\frac{3}{8}$ days

(3) $8\frac{4}{5}$ days

(4) $7\frac{1}{2}$ days

PRACTICE SHEET 2

1. A and B can do a work in 18 and 24 days respectively. They worked together for 8 days and then A left. The remaining work was finished by B in :

(1) 5 days

(2) $5\frac{1}{3}$ days

(3) 8 days

(4) 10 days

2. A can do a piece of work in 12Vdays and B can do it in 18 days. They work together for 2 days and then A leaves. How long will B take to finish the remaining work?

(1) 6 days

(2) 8 days

(3) 10 days

(4) 13 days

3. A and B can do a job in 6 and 12 days respectively. They began the work together but A leaves after 3 days. Then the total number of days needed for the completion of the work is:

(1) 4 days

(2) 5 days

(3) 6 days

(4) 9 days

4. A and B working separately can do a piece of work in 10 days and 15 days respectively. If they work on alternate days beginning with

A, in how many days will the work be completed?

(1) 18 days

(2) 13 days

(3) 12 days

(4) 6 days

5. A and B can do a piece of work in 28 and 35 days respectively. They began to work together but A leaves after sometime and B completed remaining work in 17 days. After how many days did A leave?

(1) $14\frac{2}{5}$ days

(2) 9 days

(3) 8 days

(4) $7\frac{5}{9}$ days

6. A and B can complete a work in 15 days and 10 days respectively. They started doing the work together but after 2 days, B had to leave and A alone completed the remaining work. The whole work was completed in:

(1) 10 days

(2) 8 days

(3) 12 days

(4) 15 days

7. A and B can complete a piece of work in 12 and 18 days respectively. A begins to do the

work and they work alternatively one at a time for one day each. The whole work will be completed in

- (1) $14\frac{1}{3}$ days (2) $15\frac{2}{3}$ days
(3) $16\frac{1}{3}$ days (4) $18\frac{2}{3}$ days

8. A, B and C can complete a work in 10, 12 and 15 days respectively. They started the work together. But A left the work before 5 days of its completion. B also left the work 2 days after A left. In how many days was the work completed?

- (1) 4 days (2) 5 days
(3) 7 days (4) 8 days

9. A can complete a piece of work in 10 days, B in 15 days and C in 20 days. A and C worked together for two days and then A was replaced by B. In how many days, altogether, was the work completed?

- (1) 12 days (2) 10 days
(3) 6 days (4) 8 days

10. A, B and C can do a piece of work in 20, 30 and 60 days respectively. In how many days can A do the work if he is assisted by B and C on every third day?

- (1) 10 days (2) 12 days
(3) 15 days (4) 20 days

11. A and B together can complete a work in 3 days. They start together. But, after 2 days, B left the work. If the work is completed after 2 more days, B alone could do the work in

- (1) 10 days (2) 4 days
(3) 6 days (4) 8 days

12. A can do a piece of work in 20 days and B in 30 days. They work together for 7 days and then both leave the work. Then C alone finishes the remaining work in 10 days. In how many days will C finish the full work?

- (1) 25 days (2) 30 days
(3) 24 days (4) 20 days

13. A and B can do a piece of work in 45 and 40 days respectively. They began the work together but A left after some days and B finished the remaining work in 23 days. A left after

- (1) 6 days (2) 9 days

- (3) 12 days (4) 5 days

14. A and B together can finish a work in 30 days. They worked on it for 20 days and then B left the work. The remaining work was done by A alone in 20 days more. In how many days can A alone finish the work?

- (1) 48 days (2) 50 days
(3) 54 days (4) 60 days

15. Ramesh and Rahman can do a work in 20 and 25 days respectively. After doing collectively for 10 days at the work, they leave the work due to illness and Suresh completes rest of the work in 3 days. How many days Suresh alone can take to complete the whole work?

- (1) 32 days (2) 28 days
(3) 29 days (4) 30 days

16. A can do a piece of work in 10 days and B can do it in 12 days. They work together for 3 days. Then B leaves and A alone continues. 2 days after that C joins and the work is completed in 2 days more. In how many days can C do it, if he works alone?

- (1) 30 days (2) 50 days
(3) 40 days (4) 60 days

17. Pratibha is thrice as efficient as Sonia and is therefore able to finish a piece of work in 60 days less than Sonia. Pratibha and Sonia can individually complete the work respectively in

- (1) 30 days, 60 days
(2) 60 days, 90 days
(3) 30 days, 90 days
(4) 40 days, 120 days

18. If A, B and C can complete a work in 6 days. If A can work twice faster than B and thrice faster than C, then the number of days C alone can complete the work is :

- (1) 33 days (2) 44 days
(3) 22 days (4) 11 days

19. A is twice as good as B and together they finish a piece of work in 16 days. The number of days taken by A alone to finish the work is

- (1) 20 days (2) 21 days
(3) 22 days (4) 24 days

20. A man does double the work done by a boy in the same time. The number of days that 3

men and 4 boys will take to finish a work which can be done by 10 men in 8 days is

(1) 4 (2) 16

(3) $7\frac{3}{11}$ (4) $8\frac{4}{5}$

21. A works twice as fast as B. If B can complete a piece of work independently in 12 days, then what will be the number of days taken by A and B together to finish the work?

(1) 4 (2) 6

(3) 8 (4) 18

22. A can complete a work in 6 days while B can complete the same work in 12 days. If they work together and complete it, the portion of the work done by A is

(1) $\frac{1}{3}$ (2) $\frac{2}{3}$

(3) $\frac{1}{4}$ (4) $\frac{1}{2}$

23. A can do $\frac{1}{2}$ of a piece of work in 5 days, B can do $\frac{3}{5}$ of the same work in 9 days and C can do $\frac{2}{3}$ of that work in 8 days. In how many days can three of them together o the work?

(1) 3 days (2) 5 days

(3) $4\frac{1}{2}$ days (4) 4 days

24. If 28 men complete $\frac{7}{8}$ of a piece of work in a week, then the number of men, who must be engaged to get the remaining work completed in another week, is

(1) 5 (2) 6

(3) 4 (4) 3

25. A can complete $\frac{1}{3}$ of a work in 5 days and B, $\frac{2}{5}$ of the work in 10 days. In how many days both A and B together can complete the work?

(1) 10 days (2) $9\frac{3}{8}$ days

(3) $8\frac{4}{5}$ days

(4) $7\frac{1}{2}$ days

26. A, B and C together can do a piece of work in 40 days. After working with B and C for 16 days, A leaves and then B and C complete the remaining work in 40 days more. A alone could do the work in

(1) 80 days (2) 90 days

(3) 100 days (4) 120 days

27. A and B together can complete a work in 8 days. B alone can complete that work in 12 days. B alone worked for four days. After that how long will A alone take to complete the work?

(1) 15 days (2) 18 days

(3) 16 days (4) 20 days

28. A and B can complete a piece of work in 12 and 18 days respectively. A begins to do the work and they work alternatively one at a time for one day each. The whole work will be completed in

(1) $14\frac{1}{3}$ days (2) $15\frac{2}{3}$ days

(3) $16\frac{1}{3}$ days (4) $18\frac{2}{3}$ days

29. A and B can separately complete a piece of work in 20 days and 30 days respectively. They worked together for some time, then B left the work. If A completed the rest of the work in 10 days, then B worked for

(1) 6 days (2) 8 days

(3) 12 days (4) 16 days

30. A and B together can complete a work in 12 days. A alone can complete in 20 days. If B does the work only half a day daily, then in how many days A and B together will complete the work?

(1) 10 days (2) 20 days

(3) 11 days (4) 15 days

PRACTICE SHEET 3

1. 39 persons can repair a road in 12 days working 5 hours a day. In how many days will 30 persons working 6 hours a day complete the work?
 (1) 10 days (2) 13 days
 (3) 14 days (4) 15 days
2. If 72 men can build a wall of 280 m length in 21 days, how many men could take 18 days to build a similar type of wall of length 100 m?
 (1) 30 (2) 10
 (3) 18 (4) 28
3. A wall of 100 metres can be built by 7 men or 10 women in 10 days. How many days will 14 men and 20 women take to build a wall of 600 metres ?
 (1) 15 (2) 20
 (3) 25 (4) 30
4. 5 persons can prepare an admission list in 8 days working 7 hours a day. If 2 persons join them so as to complete the work in 4 days, they need to work per day for :
 (1) 10 hours (2) 9 hours
 (3) 12 hours (4) 8 hours
5. 4 mat-weavers can weave 4 mats in 4 days. At the same rate how many mats would be woven by 8 mat-weavers in 8 days ?
 (1) 4 (2) 8
 (3) 12 (4) 16
6. 10 men working 6 hours a day can complete a work in 18 days. How many hours a day must 15 men work to complete the same work in 12 days ?
 (1) 6 days (2) 10 days
 (3) 12 days (4) 15 days
7. 'x' number of men can finish a piece of work in 30 days. If there were 6 men more, the work could be finished in 10 days less. The original number of men is
 (1) 6 (2) 10
 (3) 12 (4) 15
8. Some carpenters promised to do a job in 9 days but 5 of them were absent and remaining men did the job in 12 days. The original number of carpenters was
 (1) 24 (2) 20
 (3) 16 (4) 18
9. Working 8 hours a day, Anu can copy a book in 18 days. How many hours a day should she work so as to finish the work in 12 days?
 (1) 12 hours (2) 10 hours
 (3) 11 hours (4) 13 hours
10. If the work done by $(x-1)$ men in $(x+1)$ days is to the work done by $(x+2)$ men in $(x-1)$ days are in the ratio 9 : 10, then the value of x is equal to :
 (1) 5 (2) 6
 (3) 7 (4) 8
11. 30 men can repair a road in 18 days. They are joined by 6 more workers. Now the road can be repaired in
 (1) 14 days (2) 15 days
 (3) 16 days (4) 17 days
12. If 6 men and 8 boys can do a piece of work in 10 days and 26 men and 48 boys can do the same in 2 days, then the time taken by 15 men and 20 boys to do the same type of work will be :
 (1) 5 days (2) 4 days
 (3) 6 days (4) 7 days
13. 5 men can do a piece of work in 6 days while 10 women can do it in 5 days. In how many days can 5 women and 3 men do it ?
 (1) 4 days (2) 5 days
 (3) 6 days (4) 8 days
14. If 3 men or 6 women can do piece of work in 16 days, in how many days can 12 men and 8 women do the same piece of work?
 (1) 4 days (2) 5 days
 (3) 3 days (4) 2 days
15. A man, a woman and a boy can complete a job in 3, 4 and 12 days respectively. How many boys must assist 1 man and 1 woman to complete the job in $1/4$ of a day?
 (1) 1 (2) 4
 (3) 19 (4) 41
16. If 16 men or 20 women can do a piece of work in 25 days. In what time will 28 men

- and 15 women do it?
 (1) 100/7 days (2) 100/3 days
 (3) 75/4 days (4) 10 days
- 17.** If 5 men or 8 women can do a piece of work in 12 days, how many days will be taken by 2 men and 4 women to do the same work?
 (1) 15 days (2) 27/2 days
 (3) 40/3 days (4) 10 days
- 18.** If 3 men or 4 women can plough a field in 43 days, how long will 7 men and 5 women take to plough it ?
 (1) 10 days (2) 11 days
 (3) 9 days (4) 12 days
- 19.** 6 men or 12 women can do a piece of work in 20 days. In how many days can 8 men and 16 women do twice as big as this work ?
 (1) 2 days (2) 5 days
 (3) 15 days (4) 10 days
- 20.** A man, a woman and a boy can together complete a piece of work in 3 days. If a man alone can do it in 6 days and a boy alone in 18 days, how long will a woman alone take to complete the work?
 (1) 9 days (2) 21 days
 (3) 24 days (4) 27 days
- 21.** 3 men or 5 women can do a work in 12 days. How long will 6 men and 5 women take to finish the work?
 (1) 20 days (2) 10 days
 (3) 4 days (4) 15 days
- 22.** Two workers A and B are engaged to do a piece of work. A working alone would take 8 hours more to complete the work than when work together. If B worked alone, would take 4 and half an hours more than when work together. The time required to finish the work together is
 (1) 5 hours (2) 4 hours
 (3) 8 hours (4) 6 hours
- 23.** A company employed 200 workers to complete a certain work in 150 days. If only one fourth of the work has been done in 50 days, then in order to complete the whole work in time, the number of additional workers to be employed was
 (1) 100 (2) 300
 (3) 600 (4) 200
- 24.** A contractor was engaged to construct a road in 16 days. After working for 12 days with 20 labours it was found that only 5/8th of the road had been constructed. To complete the work in stipulated time the number of extra labours required is :
 (1) 18 (2) 10
 (3) 12 (4) 16
- 25.** Janardan completes 2/3 of his work in 10 days. Time he will take to complete 3/5 of the same work, is
 (1) 8 days (2) 6 days
 (3) 9 days (4) 4 days
- 26.** Two workers A and B working together completed a job in 5 days. If A worked twice as efficiently as he actually did and B worked 1/3 as efficiently as he actually did, the work would have been completed in 3 days. To complete the job alone, A would require
 (1) 26/5 days (2) 25/4 days
 (3) 15/2 days (4) 35/4 days
- 27.** A man undertakes to do a certain work in 150 days. He employs 200 men. He finds that only a quarter of the work is done in 50 days. The number of additional men that should be appointed so that the whole work will be finished in time is :
 (1) 75 (2) 100
 (3) 125 (4) 50
- 28.** A contractor undertook to finish a certain work in 124 days and employed 120 men. After 64 days, he found that he had already done 2/3 of the work. How many men can be discharged now so that the work may finish in time ?
 (1) 48 (2) 56
 (3) 40 (4) 50
- 29.** If 7 men working 7 hrs a day for each of 7 days produce 7 units of work, then the units of work produced by 5 men working 5 hrs a day for each of 5 days is
 (1) 25/343 (2) 125/49
 (3) 49/125 (4) 343/25
- 30.** Seventy-five men are employed to lay down a railway line in 3 months. Due to certain emergency conditions, the work was to be finished in 18 days. How many more men should be employed to complete the work in the desired time ?

(1) 300

(2) 325

(3) 350

(4) 375

PRACTICE SHEET 4

- A and B can complete a piece of work in 15 days and 10 days respectively. They contracted to complete the work for 30,000. The share of A in the contracted money will be
 (1) 18,000 (2) 16,500
 (3) 12,500 (4) 12,000
- A man and a boy received 800 as wages for 5 days for the work they did together. The man's efficiency in the work was three times that of the boy. What are the daily wages of the boy?
 (1) 76 (2) 56
 (3) 44 (4) 40
- A daily-wage labourer was engaged for a certain number of days for 5,750; but being absent on some of those days he was paid only 5,000. What was his maximum possible daily wage?
 (1) 125 (2) 250
 (3) 375 (4) 500
- A, B and C completed a work costing 1,800. A worked for 6 days, B for 4 days and C for 9 days. If their daily wages are in the ratio of 5 : 6 : 4, how much amount will be received by A?
 (1) 800 (2) 600
 (3) 900 (4) 750
- A labourer was appointed by a contractor on the condition that he would be paid 75 for each day of his work but would be fined at the rate of 15 per day for his absence, apart from losing his wages. After 20 days, the contractor paid the labourer 1140. The number of days the labourer abstained from work was
 (1) 3 (2) 5 (3) 4 (4) 2
- Two men undertook to do a job for 1400. One of them can do it alone in 7 days, and the other in 8 days. With the assistance of a boy they together completed the work in 3 days. How much money will the boy get?
 (1) 300 (2) 325
 (3) 275 (4) 250
- If 5 men or 7 women can earn 5,250 per day, how much would 7 men and 13 women earn per day?
 (1) 11,600 (2) 11,700
 (3) 16,100 (4) 17,100
- 2 men and 1 woman together can complete a piece of work in 14 days, while 4 women and 2 men together can do it in 8 days. If a man gets 600 per day, how much should a woman get per day?
 (1) 400 (2) 450
 (3) 480 (4) 360
- Two men undertake a job for 960. They can complete it in 16 days and 24 days respectively. They work along with a third man and take 8 days to complete it. Then the share of the third man should be
 (1) 155 (2) 165
 (3) 160 (4) 150
- If there is a reduction in the number of workers in a factory in the ratio 15 : 11 and an increment in their wages in the ratio 22 : 25, then the ratio by which the total wages of the workers should be decreased is
 (1) 6 : 5 (2) 5 : 6
 (3) 3 : 7 (4) 3 : 5

- 11.** Stanie and Paul take a piece of work for 28,800. One alone could do it in 36 days, the other in 48 days. With the assistance of an expert, they finish it in 12 days. How much remuneration the expert should get ?
 (1) 10000 (2) 18000
 (3) 16000 (4) 12000
- 12.** A and B were assigned to do a job for an amount of 1,200. A alone can do it in 15 days, while B can do it in 12 days. With the help of C, they can finish in 5 days. The share of amount that C earns is
 (1) 300 (2) 400
 (3) 500 (4) 600
- 13.** A sum of money is sufficient to pay A's wages for 21 days and B's wages for 28 days. The same money is sufficient to pay the wages of both for :
 (1) 12 days (2) 14 days 14
 (3) 24 days (4) 12 days 12
- 14.** A can do a piece of work in 12 days while B alone can do it in 15 days. With the help of C they can finish it in 5 days. If they are paid 960 for the whole work how much money A gets ?
 (1) 480 (2) 240
 (3) 320 (4) 400
- 15.** A, B and C together earn 150 per day while A and C together earn 94 and B and C together earn 76. The daily earning of 'C' is
 (1) 56 (2) 20
 (3) 34 (4) 75
- 16.** Two pipes A and B can fill a tank in 20 minutes and 30 minutes respectively. If both pipes are opened together, the time taken to fill the tank is :
 (1) 50 minutes (2) 12 minutes
 (3) 25 minutes (4) 15 minutes
- 17.** A tap can empty a tank in one hour. A second tap can empty it in 30 minutes. If both the taps operate simultaneously, how much time is needed to empty the tank?
 (1) 20 minutes (2) 30 minutes
 (3) 25 minutes (4) 15 minutes
- 18.** A cistern can be filled with water by a pipe in 5 hours and it can be emptied by a second pipe in 4 hours. If both the pipes are opened when the cistern is full, the time in which it will be emptied is :
 (1) 9 hours (2) 18 hours
 (3) 20 hours (4) 12 hours
- 19.** Two pipes A and B can separately fill a cistern in 60 minutes and 75 minutes respectively. There is a third pipe in the bottom of the cistern to empty it. If all the three pipes are simultaneously opened, then the cistern is full in 50 minutes. In how much time the third pipe alone can empty the cistern?
 (1) 110 minutes (2) 100 minutes
 (3) 120 minutes (4) 90 minutes
- 20.** Two pipes can fill a cistern in 3 hours and 4 hours respectively and a waste pipe can empty it in 2 hours. If all the three pipes are kept open, then the cistern will be filled in :
 (1) 5 hours (2) 8 hours
 (3) 10 hours (4) 12 hours
- 21.** 12 pumps working 6 hours a day can empty a completely filled reservoir in 15 days. How many such pumps working 9 hours a day will empty the same reservoir in 12 days ?
 (1) 15 (2) 9
 (3) 10 (4) 12
- 22.** Three pipes P, Q and R can separately fill a cistern in 4, 8 and 12 hours respectively. Another pipe S can empty the completely filled cistern in 10 hours. Which of the following arrangements will fill the empty cistern in less time than others?
 (1) Q alone is open.
 (2) P and S are open.
 (3) P, R and S are open.
 (4) P, Q, R, S are open all together
- 23.** Two pipes can fill a cistern separately in 10 hours and 15 hours. They can together fill the cistern in
 (1) 6 hours (2) 7 hours
 (3) 8 hours (4) 9 hours
- 24.** Three taps A, B and C together can fill an empty cistern in 10 minutes. The tap A alone can fill it in 30 minutes and the tap B alone in 40 minutes. How long will the tap C alone take to fill it ?
 (1) 16 minutes (2) 24 minutes
 (3) 32 minutes (4) 40 minutes
- 25.** One tap can fill a water tank in 40 minutes and another tap can make the filled tank empty in 60 minutes. If both the taps are

open, in how many hours will the empty tank be filled ?

- (1) 2 hours (2) 2.5 hours
(3) 3 hours (4) 3.5 hours

26. A tank can be filled by pipe A in 2 hours and pipe B in 6 hours. At 10 A.M. pipe A was opened. At what time will the tank be filled if pipe B is opened at 11 A.M.?

- (1) 12.45 A.M. (2) 5 P.M.
(3) 11.45 A.M. (4) 12 P.M.

27. Two pipes, P and Q, together can fill a cistern in 20 minutes and P alone can in 30 minutes. Then Q alone can fill the cistern in

- (1) 62 minutes (2) 60 minutes
(3) 61 minutes (4) 51 minutes

28. Two pipes A and B can fill a cistern in 3 hours and 5 hours respectively. Pipe C can empty in 2 hours. If all the three pipes are

open, in how many hours the cistern will be full?

- (1) can't be filled (2) 10 hours
(3) 15 hours (4) 30 hours

29. Two pipes can fill a tank with water in 15 and 12 hours respectively and a third pipe can empty it in 4 hours. If the pipes be opened in order at 8, 9 and 11 a.m. respectively, the tank will be emptied at

- (1) 11 : 40 a.m. (2) 12 : 40 p.m.
(3) 1 : 40 p.m. (4) 2 : 40 p.m.

30. A Boy and girl together fill a cistern with water. The boy pours 4 litres of water every 3 minutes and the girl pours 3 litres every 4 minutes. How much time will it take to fill 100 litres of water in the cistern ?

- (1) 36 minutes (2) 42 minutes
(3) 48 minutes (4) 60 minutes

CDS PYQ

1. If 3 men and 4 boys can do a piece of work in 8 days then 6 men and 8 boys can do the same work in?

[CDS 2013 (I)]

- (a) 2 days (b) 4 days
(c) 6 days (d) 18 days

2. A mason can build a tank in 12 h. After working for 6 h, he took the help of a boy and finished the work in another 5 h. The time that the boy will take alone to complete the work is

[CDS 2013 (I)]

- (a) 30 h (b) 45 h
(c) 60 h (d) 64 h

3. X can complete a job in 12 days. If X and Y work together, they can complete the job in $6\frac{2}{3}$ days. Y alone can complete the job in

[CDS 2013 (I)]

- (a) 10 days (b) 12 days
(c) 15 days (d) 18 days

4. Pipe A can fill a tank in 10 min and pipe B can empty it in 15 min. If both the pipes are opened in an empty tank, the time taken to make it full is

[CDS 2013 (I)]

- (a) 20 min (b) 25 min
(c) 30 min (d) None of these

5. 4 goats or 6 sheep's can graze a field in 50 days. 2 goats and 9 sheep's can graze the field in

[CDS 2013 (II)]

- (a) 100 days (b) 75 days
(c) 50 days (d) 25 days

6. A can finish a work in 15 days, B in 20 days and C in 25 days. All these three worked together and earned Rs 4700. The share of C is

[CDS 2013 (II)]

- (a) 1200 (b) 1500
(c) 1800 (d) 2000

7. 20 workers working for 5 h per day complete work in 10 days. If 25 workers are employed to work 10 h per day, what is the time required to complete the work?

[CDS 2013 (II)]

- (a) 4 days (b) 5 days
(c) 6 days (d) 8 days

8. 18 men can earn Rs 360 in 5 days. How much money will 15 men earn in 9 days?

[CDS 2013 (II)]

- (a) 600 (b) 540
(c) 480 (d) 360

9. 2 men and 1 woman can complete a piece of work in 14 days, while 4 women and 2 men can do the same work in 8 days. If a man gets Rs 90 per day, what should be the wages per day of a woman?

[CDS 2013 (II)]

- (a) 48 (b) 60
(c) 72 (d) 135

10. A can do a piece of work in 4 days and B can complete the same work in 12 days. What is the number of days required to do the same work together?

[CDS 2013 (II)]

- (a) 2 days (b) 3 days
(c) 4 days (d) 5 days

11. X can do a work in 16 days in how many days will the work be completed by Y if efficiency of Y is 60% more than that of X?

[CDS 2013 (II)]

- (a) 10 days (b) 12 days
(c) 25 days (d) 30 days

12. 15 men complete a work in 16 days if 24 men are employed then the time required to complete that work will be:

[CDS 2014 (I)]

- (a) 7 days (b) 8 days
(c) 10 days (d) 12 days

13. A, B and C can do a piece of work individually in 8, 12 and 15 days, respectively. A and B start working but A quits after working for 2 days. After this, C joins B till the completion of work. In how many days will the work be completed?

[CDS 2014 (I)]

- (a) $5\frac{8}{9}$ days (b) $4\frac{6}{7}$ days
(c) $6\frac{7}{13}$ days (d) $3\frac{3}{4}$ days

14. A, B and C can do a piece of work individually in 8, 12 and 15 days, respectively. A and B start working but A quits after working for 2 days. After this, C joins B till the completion of work. In how many days will the work be completed?

[CDS 2014 (II)]

- (a) $3\frac{8}{9}$ days (b) $5\frac{8}{9}$ days
(c) $5\frac{2}{3}$ days (d) $6\frac{1}{18}$ days

15. Pipe A can fill a tank in 10 min. and pipe B can empty it in 15 min. If both the pipes are opened in an empty tank the time taken to make it full is:

[CDS 2014 (II)]

- (a) 20min (b) 25min
(c) 30min (d) None of these

16. A is thrice as efficient as B and hence completes a work in 40 days less than the number of days taken by B. What will be the number of days taken by both of them when working together?

[CDS 2014 (II)]

- (a) 22.5 days (b) 15 days
(c) 20 days (d) 18 days

17. If 10 persons can dig 8 ft trench in 12 days, then how many days will 8 persons take to dig 6 ft. trench?

[CDS 2014 (II)]

- (a) 10 days (b) 10.25 days
(c) 11 days (d) 11.25 days

18. The efficiency of P is twice that of Q, whereas the efficiency of P and Q together is three times that of R. If P, Q and R work together on a job, in what ratio should they share their earnings?

[CDS 2015 (I)]

- (a) 2:1:1 (b) 4:2:1
(c) 4:3:2 (d) 4:2:3

19. A and B are two taps which can fill a tank individually in 10 min and 20 min, respectively. However, there is a leakage at

the bottom, which can empty a filled tank in 40 min. If the tank is empty initially, then how much time will both the taps take to fill the tank with leakage?

[CDS 2015 (II)]

- (a) 2 min (b) 4 min
(c) 5 min (d) 8 min

20. If 4 men working 4h per day for 4 days complete 4 units of work, then how many units of work will be completed by 2 men working for 2 h per day in 2 days?

[CDS 2015 (II)]

- (a) 2 (b) 1
(c) $\frac{1}{2}$ (d) $\frac{1}{8}$

21. If m persons can paint a house in d days, then how many days will it take for (m + 2) persons to paint the same house?

[CDS 2015 (II)]

- (a) $md + 2$ (b) $md - 2$
(c) $\frac{m+2}{md}$ (d) $\frac{md}{m+2}$

22. Two pipes A and B can fill a tank in 60 min and 75 min, respectively. There is also an outlet C. If A, B and C are opened together, then the tank is full in 50 min. How much time will be taken by C to empty the full tank?

[CDS 2016 (I)]

- (a) 100 min (b) 110 min
(c) 120 min (d) 125 min

23. A can do 50% more work than B in the same time. B alone can do a piece of work in 30 hrs. B starts working and had already worked for 12 hours when A joins him. How many hours should B and A work together to complete the remaining work?

[CDS 2016 (II)]

- (a) 6 hours (b) 12 hours
(c) 4.8 hours (d) 7.2 hours

24. A tank can be filled by pipe X in 2 hours and pipe Y in 6 hours. At 10 a.m. Pipe X was opened. At what time will the tank be filled if pipe Y is opened at 11 a.m.?

[CDS 2016 (II)]

- (a) 12:45 hours (b) 5:00 p.m.
(c) 11:45 a.m. (d) 11:50 a.m.

25. If 15 men take 21 days of 8 hours each to do a piece of work, then what is the number of days of 6 hours each that 21 women would

take, if three women would do as much work as 2 men ?

[CDS 2017 (I)]

- (a) 18 (b) 20
(c) 25 (d) 30

26. A and B working together can finish a piece of work in 12 days while B alone can finish it in 30 days. In how many days A can alone finish the work?

[CDS 2017 (I)]

- (a) 18 days (b) 20 days
(c) 24 days (d) 25 days

27. If 5 men can do a piece of work in 10 days and 12 women can do the same work in 15 days, the number of days required to complete the work by 5 men and 6 women

[CDS 2017 (I)]

- (a) $7\frac{1}{2}$ days (b) 8 days
(c) $9\frac{1}{2}$ days (d) 12 days

28. 30 men can complete a job in 40 days. However, after 24 days some men left the job the remaining people took another 40 days to complete the job the number of men who left the job is

[CDS 2017 (II)]

- (a) 24 (b) 18
(c) 12 (d) 6

29. A tap can fill a tube in 10 hours. After opening the tap for 5 hours it was found that a small outlet at the bottom of the tube was open and water was leaking through it. It was then immediately closed. It took 7 hours to fill the tube after closing the outlet. What time will be taken by the outlet to empty the full tube of water?

[CDS 2017 (II)]

- (a) 35 hrs (b) 25 hrs
(c) 20 hr (d) 17 hrs

30. To maintain 8 cows for 60 days, a milkman has to spend Rs 6400. To maintain 5 cows for n days, he has to spend Rs 4800. What is the value of n ?

[CDS 2017 (II)]

- (a) 46 days (b) 50 days
(c) 58 days (d) 72 days

31. 4 goats or 6 sheep can graze a field in 50 days. 2 goats and 3 sheep will graze it in:

[CDS 2017 (II)]

- (a) 200 days (b) 150 days
(c) 100 days (d) 50 days

32. A work when done by 10 women is completed in 12 days. The same work can be completed in 8 days when done by 5 men. How many days will it take to complete when 6 women and three men are employed to perform the same job?

[CDS 2018 (I)]

- (a) 12 (b) 10
(c) 8 (d) 5

33. A man undertakes to do a certain work in 150 days he employs 200 man he finds that only a quarter of the work is done in 50 days. How many additional men should he employs so that the whole work is finished in the time?

[CDS 2018 (I)]

- (a) 75 (b) 85
(c) 100 (d) 120

34. If 5 tractors can plough 5 hectares of land in 5 days. then what is the number of tractors required to plough 100 hectares in 50 days

[CDS 2018 (I)]

- (a) 100 (b) 20
(c) 10 (d) 5

35. A water tank has been fitted with two taps P and Q and a drain pipe R. Taps P and Q fill at the rate of 12 litre per minute and 10 litre per minute respectively.

Consider the following statements S_1 , S_2 and S_3

S_1 : pipe R drains out at the rate of 6 litre per minutes

S_2 : if both the taps and the drain pipes are opened simultaneously then the water tank is filled in 5 hours 45 minutes

S_3 : Pipe R drains out (fully) the field tank in 15 hours 20 minutes.

To know what is the capacity of the tank which one of the following is correct ?

[CDS 2018 (I)]

- (a) S_2 is only sufficient
(b) S_1 , S_2 and S_3 are necessary
(c) any two out of S_1 , S_2 and S_3 are sufficient
(d) none of the above

36. Two workers A and B working together completed a job in 5 days had A work twice

as efficiently as he actually did and B worked one-third as efficiency as he actually did the work would have completed in 3 days. In how many days could a alone completed the job

[CDS 2018 (II)]

- (a) $3\frac{1}{2}$ days (b) $4\frac{1}{6}$ days
(c) $5\frac{1}{2}$ days (d) $6\frac{1}{4}$ days

37. A is thrice as good a workman as B and takes 10 days less to do a piece of work than B takes. the number of days taken by B alone to finish the work is

[CDS 2018 (II)]

- (a) 12 (b) 15
(c) 20 (d) 30

38. 12 men work 8 hr per day and require 10 days to build a wall, if 8 men are available, how many hours per day must they work to finish the work in 8 days

[CDS 2018 (II)]

- (a) 10 (b) 12
(c) 15 (d) 18

39. 12 person can paint 10 identical rooms in 16 days. In how many days can 8 persons paint 20 such rooms?

[CDS 2018 (II)]

- (a) 12 (b) 24
(c) 36 (d) 48

40. X and Y together can finish a job in 6 days, X can alone do the same job in 12 days. how long will we alone take to do the same job

[CDS 2018 (II)]

- (a) 16 days (b) 12 days
(c) 10 days (d) 8 days

41. A field can be reaped by 12 men or 18 women in 14 days. In how many days can 8 men and 16 women reap it?

[CDS 2019 (I)]

- (a) 26 days (b) 24 days
(c) 9 days (d) 8 days

42. Tushar takes 6 hours to complete a piece of work, while Amar completed the same work in 10 hours. if both of them work together then what is the time required to complete the work ?

[CDS 2019 (I)]

- (a) 3 h (b) 3 h 15 min
(c) 3 h 30 min (d) 3 hr 45 min.

43. A stock of food grains is enough for 240 men for 48 days. How long will the same stock last for 160 men?

[CDS 2019 (II)]

- (a) 72 days (b) 64 days
(c) 60 days (d) 54 days

44. Two taps X and Y are fixed to a water tank, if only X is opened, it drains out the full tank of water in 20 min. If both X and Y are opened, then they drain out the full tank of water in 15 min. If only Y is opened, how long does it take to drain out the full tank of water?

[CDS 2019 (II)]

- (a) 30min (b) 45min
(c) 60 min (d) 90 min

45. If the ratio of the work done by $(x + 2)$ workers in $(x - 3)$ days to the work done by $(x + 4)$ workers in $(x - 2)$ days is 3:4, then what is the value of x ?

[CDS 2019 (II)]

- (a) 8 (b) 10
(c) 12 (d) 15

46. If 6 men and 8 women can do a piece of work in 10 days and 13 men and 24 women can do the same work in 4 days, then what is the ratio of daily work done by a man to that of a woman?

[CDS 2020 (I)]

- (a) 2:1 (b) 1:2
(c) 4:3 (d) 3:4

47. In a water tank there are two outlets. It takes 20 min to empty the tank if both the outlets are opened. If the first outlet is opened, the tank is emptied in 30 min. What is the time taken to empty the tank by second outlet?

[CDS 2020 (I)]

- (a) 30 min (b) 40 min
(c) 50 min (d) 60 min

48. If x men working x hours per day can do x units of work in x days, then y men working y hours per day would be able to do k units of work in y days. What is the value of k ?

[CDS 2020 (II)]

- (a) x^2y^{-3} (b) x^3y^{-2}
(c) y^2x^{-3} (d) y^3x^{-2}

49. If 20 persons can clean 20 floors in 20 days, then how many days can 16 persons clean 16 floors?

[CDS 2021 (I)]

- (a) 25 days (b) 24 days
(c) 20 days (d) 16 days

50. Let the work done by $(x - 1)$ men in $(x + 1)$ days be y . Let the work done by $(x + 2)$ men in $(x - 1)$ days be z . If $y:z = 9:10$, then what is the value of x ?

[CDS 2021 (I)]

- (a) 8 (b) 9
(c) 10 (d) 12

51. 20 men are supposed to complete a work in 10 days. After working for 5 days, they realize that only one-fourth of the work is done. How many more men they need to employ to finish the work on time?

[CDS 2021 (II)]

- (a) 40 (b) 30
(c) 20 (d) 15

52. Let work done by $(3n - 1)$ men in $(2n + 1)$ days be x and work done by $(3n + 1)$ men in $(4n - 3)$ days be y . If $x : y = 6 : 11$, then what is the value of n ?

[CDS 2021 (II)]

- (a) 6 (b) 7
(c) 8 (d) 9

53. Sheela can stitch a suit in 2 days, while Meena can stitch a suit in $1\frac{1}{2}$ days. How many days will both take in stitching 30 suits?

[CDS 2021 (II)]

- (a) 32 days (b) 33 days
(c) 35 days (d) 40 days

54. 8 men or 12 women can do a piece of work in 24 days. In how many days can the work be done by 8 men and 12 women?

[CDS 2022 (I)]

- (a) 12 days
(b) 18 days
(c) 24 days
(d) cannot be determined due to insufficient data

55. X and Y can do a piece of work in 45 days and 40 days respectively. They begin to work together, but X leaves after n days and then

Y completes and remaining work in 23 days.
What is n equal to?

[CDS 2022 (II)]

- (a) 8 (b) 9
(c) 10 (d) 12

56. 480 persons working 10 hours per day complete one-fourth of work in 10 days. How many additional persons are to be employed in order to complete the remaining work in 20 days, working 8 hours per day?

[CDS 2022 (II)]

- (a) 400 (b) 420
(c) 480 (d) 500

57. 12 women and 16 men can do a piece of work in 5 days. 13 women and 24 men can do it in 4 days. How long will 25 women and 50 men take to do it?

[CDS 2022 (II)]

- (a) 1 day (b) 2 days
(c) 3 days (d) 4 days

58. If 17 women and 24 men can do a piece of work in 5 days and 12 women and 23 men can do it in 6 days, then which one of the following is correct?

[CDS - 2023 (1)]

- (a) efficiency of 13 women = efficiency of 18 men
(c) efficiency of 11 women = efficiency of 16 men
(c) efficiency of 13 women = efficiency of 17 men
(d) efficiency of 11 women = efficiency of 15 men

59. Three taps A, B and C together can fill a tank in 6 hours. Tap C alone can fill the tank in 12 hours. To fill the tank, when it is empty, all the three taps are started together. After working t hours, tap C is closed and the tank is filled in 8 more hours. What is t equal to?

[CDS - 2023 (1)]

- (a) 1 (b) 2
(c) 4 (d) 6

60. A, B and C can complete a work in x, 1.5x and 2x days respectively. If they complete the work together, in what ratio should they be paid?

[CDS - 2023 (1)]

- (a) 2:3:4 (b) 6:4:3
(c) 3:2:1 (d) 4:3:2

61. A can do a certain work at twice the speed of B. Further, B can do the same work at 1.5 times the speed of C. All of them together can finish the work in 12 days. In how many days can C alone finish the work?

[CDS - 2023 (1)]

- (a) 36 days (b) 45 days
(c) 60 days (d) 66 days

62. If A and B can finish a work in 10 days, B and C can finish the same work in 12 days, C and A can finish the same work in 15 days; then in how many days can A, B and C together finish half of the work?

[CDS-2023 (2)]

- (a) 8 days (b) 5 days
(c) 4 days (d) 3 days

63. Three persons A, B and C together can do a piece of work in 36 days. A and B together can do five times as much work as C alone, B and C together can do as much work as A alone. If A and C together can do n times as much work as B alone, then what is the value of n?

[CDS-2023 (2)]

- (a) 1.5 (b) 2
(c) 2.5 (d) 3

64. p number of men can finish a piece of work in q days. If there are 50% more men, then the work will be finished 12 days earlier. What is the value of q?

[CDS-2024 (1)]

- (a) 48
(b) 40
(c) 36
(d) Cannot be determined due to insufficient data

65. If the work done by x men in (x + 1) days is equal to the work done by (x + 5) men in (x - 2) days, then what is the value of x?

[CDS-2024 (1)]

- (a) 5 (b) 6
(c) 7 (d) 8

66. 50 men can complete a work in 40 days. They being the work together but a batch of 5 men left after reach period of 10 days. What is the time to complete the work?

[CDS-2024 (1)]

- (a) 45 days (b) 50 days
(c) 55 days (d) 60 days

67. A, B, C, D can complete a work in 3, 6, 9, 12 hours respectively. Further, only one person can work a time in each hour and nobody can work for two consecutive hours. It is not necessary to engage all. What is the

minimum number of hours that they will take to finish the work?

[CDS-2024 (1)]

- (a) 36/25 (b) 12/5
(c) 4 (d) 2

CAPF PYQ

1. If 5 persons can weave 160 mats in 8 days, how many mats will 8 persons weave in 6 days

[CAPF 2012]

- (a) 200 (b) 192
(c) 190 (d) 180

2. Two pipes A and B can fill a tank in 12 minutes and 16 minutes respectively, if both the pipes are opened together then after how much time B should be closed so that the tank is full in 9 minutes

[CAPF 2017]

- (a) 3 and half minutes
(b) 4 minutes

- (c) 4 and half minutes
(d) 4 minutes 45 sec

3. A and B together can finish a job in 20 days. B and C together can finish the same job in 30 days. If A and C together can finish it in 24 days, in how many days can A alone finish the job?

[CAPF 2021]

- (a) $35\frac{2}{7}$ (b) $37\frac{2}{7}$
(c) $34\frac{2}{7}$ (d) $33\frac{2}{7}$
